TITLE INDEX

Alternaria solani (Ellis & Martin) Jones and Grout, two isolates of, carbon & nitrogen utilisation by (Rao and Apparao), 222.

Anabaena circinalis Rabh., nitrogen fixation and organic matter produced by, and their significance in rice culture, observations on (Subrahmanyan and Sahay), 164.

Angiosperms, some Indian, chromosome numbers in, II, (Raj), 253.

Aquatic bugs (Hemiptera) injurious to the pond fishes, observations on the biology of, I (Julka), 49.

Atrovenetin, II (Narasimhachari and others), 160.

Daphnid (*Moina dubia* Gurney and Richards), survival of, in different oxygen content levels (Krishnamoorthi), 90.

Dicotyledons, apical organization of the roots of, II, III (Pillai and others), 267, 296.

Gymnosperms, studies on foliar sclereids in (a preliminary survey), Rao, 196.

Helobiae, morphological and anatomical studies in, III, IV, V (Singh), 98, 147, 316.

Kaghzi lime, studies in the vegetative growth in (Motial), 262.

Mentha arvensis Linn. var. *Piperascens holmes* (Japanese Mint), influence of gibberellic acid on, a preliminary study on the (Kaul and Kapoor), 135.

Millepedes, transpiration in, studies on, I (Dwarakanath and Job), 142.

Musaceae, studies in, III (Jain), 170.

Musca domestica nebulo Fabr. (Diptera—Cyclorrhapha—Muscidae), studies on the pupation of (Karandikar and Ranade), 204.

Mystus vittatus, Cutaneous sense-organs of, morphology and histology of the (Agarwal and Rajbanshi), 39.

N^{15} tracer studies on the transformation of applied nitrogen in submerged rice soils (Patnaik), 25.

N^{15} tracer studies on the utilization of fertilizer nitrogen by rice in relation to time of application (Patnaik), 31.

Piricularia oryzae Cav. causing blast disease of rice, host range of, studies on the (Veeraraghavan and Padmanabhan), 109.

Plankton of the East Coast of India, studies on the, II (Subrahmanyan and Sen Gupta), 12.

Pteridophytes, studies in, V (Bhambie), 242.

Purple blotch disease of onion in Punjab, II (Pandotra), 326.

Rice plant (*Oryza sativa* L.), nutrition of the, studies on the, VIII (Patnaik and others), 309.

Sandal trees of Hongal Forest Range of Mysore State, some abnormal foliage in the, observations on (Rao and others), 121.

Spiders of the family Thomisidae from India, on some new species of (Tikader), 277.

Sugarcane, a biochemical study of, contributions to, II (Parthasarathi), 81.

Taraxaca, Indian, palynological studies on (Chopra and Nair), 214.

Vision, the new physiology of, VIII, IX, X, XI, XII, XIII, XIV, XV, XVI, XVII (Raman), 1, 7, 63, 71, 125, 129, 181, 187, 237, 291.
